THE PROBLEM

This isn't a job search.
It's a strategic decision.

The typical approach — recruiter calls, network outreach, reactive interviewing — will determine your income, your reputation, your trajectory, and whether your next tenure is 18 months or 5 years.

CRO Transitions by the Numbers

The problem isn't talent.

It's that CROs accept roles inside systems that were never designed to support them. These structural risks are detectable before accepting the offer. This program teaches you to detect them.
